

MUHAMMAD RAYASAT

Agentic AI Developer | Prompt Engineer | Python & C++ Developer
Lahore, Pakistan | online723@gmail.com | +92-329-7742837 | linkedin.com/in/m-rayasat

PROFESSIONAL SUMMARY

Motivated Computer Science student at NUML with hands-on expertise in Agentic AI, Prompt Engineering, Python, and C++. Passionate about building intelligent automation systems and scalable digital applications. Strong communicator with real teaching experience and a goal-driven approach to AI development.

SKILLS

- Agentic AI & Generative AI Development
- Prompt Engineering & AI Automation
- Problem Solving & Code Optimization
- Python | C++ | C Language | OOP
- VS Code | MS Office | Canva | CapCut | Typing 40 WPM
- Teaching | Team Collaboration | Communication

EXPERIENCE

Science Teacher — Private Academy, Lahore

Aug 2025 – Present

- Teach Matric & Intermediate students, simplifying complex concepts for exam readiness.
- Develop problem-solving skills and prepare students for board examinations.
- Create a positive, confidence-building classroom environment for strong academic performance.

EDUCATION

BS Computer Science — National University of Modern Languages (NUML), Lahore

Aug 2026 – Sep 2030

Focused on AI, programming, and modern software development technologies.

Intermediate in Computer Science (ICS) — Govt. Islamia Graduate College, Civil Lines, Lahore

Aug 2023 – Aug 2025

Strong foundation in Computer Science, Mathematics, programming logic, and analytical reasoning.

CERTIFICATIONS

Agentic & Generative AI

July 2025

AI fundamentals, Prompt Engineering, Generative AI concepts, and intelligent automation workflows.

MS Office Specialist

Advanced proficiency in Word, Excel, and PowerPoint — document formatting, data management, and presentations.

PROJECTS

AI Prompt Engineering

- Designed optimized prompts for AI-based task automation and productivity enhancement.
- Improved AI response quality using structured prompting techniques.

Python Programming

- Developed automation scripts and logic-based console applications using Python.

C & C++ Programming

- Built problem-solving programs using arrays, functions, loops, and OOP concepts.

Video Editing

- Edited educational and creative videos with transitions, effects, and subtitles using CapCut

Project Sources

- My all the projects have been pushed on my GitHub username "M-Rayasat"
